

The Essential fly trap providing faster insect elimination by means of its unique design and UV technology

VECTOR[®] Plasma One[™]

The Vector[®] Plasma One[™] is proven to increase your insect catch for faster results.

The latest generation of Insect Light traps,
The Vector[®] Plasma One[™] is the brightest trap in the family.
Designed for low tolerance food service environments,
the unit features a thin, sleek design just 64mm wide that
can be installed vertically, horizontally in corners
or free standing

- **Faster results**
- **Higher efficiency**
- **Unique technology**

BRANDENBURG
UK Limited

The newly designed Vector® Plasma One™ benefits from a new all Aluminium construction, it has been developed as one of the brightest traps on the market with the fastest catch rate. Customer tolerances to pest problems are diminishing and their demands for immediate results are increasing. Tests show the Vector® Plasma One™ has the faster catch rate than any other fly traps of its kind.

Engineered with the latest technology incorporating an electronic ballast, and featuring one 36 Watt bulb, this technology increases the level of UV, ensures a faster start up, flicker free operation and reduces energy costs when comparing it to similar traps in the market place.

Flies quickly detect the high levels of UV and head straight for the discreetly placed glueboard behind the attractively designed screen panel. The Vector® Plasma One™ is an ideal trap for use in both customer sensitive areas and those with heavy fly pressure. These customers will appreciate the quick catch stemming from the high UV output (36 Watts) and will see rapid results and reap the benefits of the high capacity glue board.

APPLICATIONS

Food production | Bakeries | Commercial Kitchens | Supermarkets | Hotel & Restaurants | Fast Food Restaurants

THE VECTOR® PLASMA ONE™ IS A BETTER TRAP BY DESIGN

- Maximum Attraction** One bulb produces 36-watts of flying insect attraction.
- High Catch Rate** Carefully angled glue boards disrupt flies' flight pattern resulting in a higher catch rate.
- Easy to Service** The lift and service grille and Universal Glue Board make this trap easy and economical to service.
- Easy Maintenance** The electronic ballast eliminates the need for bulb starters and, therefore, never requires starter replacement.
- Constant UV Output** The high frequency electronic ballast provides flicker free, silent UV output.
- Light Weight** New sleek Aluminium design, easy to carry and install.
- Thin Design** Unobtrusive profile is suitable for most back-of-house fly control needs. Versatile for easy placement.
- Sanitary Solution** Keeps flying insects intact and confined to the glue board surface for easy disposal.

TECHNICAL DATA

Model	Description	Dimensions mm (Height Width Depth)	Weight	Lamps
PSM136-1-1	Plasma 36 Watt with grille	164 x 519 x 68	1.77kg	1 x 36W
PSM136S-1-1 (safety tubes)	Plasma 36 Watt with grille	164 x 519 x 68	1.77kg	1 x 36W
PSM136-1-3	Plasma 36 Watt with screen	164 x 519 x 68	1.77kg	1 x 36W
PSM136S-2-3 (safety tubes)	Plasma 36 Watt with screen	164 x 519 x 68	1.77kg	1 x 36W
