

BUGOFF FITTING IS BEST ACHIEVED WITH A PERSON ON EITHER SIDE OF THE BED

OUR LATEST FABRIC IS DENSER WITH FAR GREATER STRETCHING CAPABILITIES, ENSURING A SNUG FIT

HOW TO FIT THE PROTECTOR TO THE BED BASE

<p>1 Remove legs or castors from bed base and flatten protruding staples</p>	<p>2 Remove backing from rubber sealing disk to expose adhesive surface</p>	<p>3 Place rubber sealing disks over each leg port leaving screw hole exposed</p>	<p>4 Make sure rubber sealing disks are in correct position over all leg ports, forming a good seal</p>
<p>5 Once all leg ports are sealed, begin enclosing bed base in bed base protector from one end, avoiding friction burns by not pulling or scraping base on floor with Bug Off fabric in between</p>	<p>6 Continue enclosing bed base in protector, gradually</p>	<p>7 Ensure protector is fitted to bed base with only zip area exposed</p>	<p>8 Start closing the zip, avoiding a zip malfunction, by pulling both sides as close as possible</p>
<p>9 Zip all the way round the bed base</p>	<p>10 Make sure zip is closed all the way and fastened securely</p>	<p>11 Check that seams are straight and that the protector is stretched uniformly over the base, then locate the positions of the leg ports with your finger. It is important to get this right, as holes will be made in these positions.</p>	<p>12 Push bed legs or castors into leg ports through the fabric of the protector, being careful not to tear or rip unduly</p>
<p>13 Screw in all bed legs or castors securely</p>	<p>14 Make sure all bed legs or castors are screwed in before flipping bed base over</p>	<p>15 Flip bed base over and position mattress ready for enclosing in mattress protector</p>	<p>The bed base is now fully protected and you are ready to fit the mattress protector to the mattress</p>

HOW TO FIT THE PROTECTOR TO THE MATTRESS

<p>1 Begin enclosing mattress in mattress protector from the head end of the mattress, so you end up with the zip at the foot of the mattress</p>	<p>2 Continue enclosing mattress in protector, gradually</p>	<p>3 Ensure protector is fitted to mattress with only zip area exposed</p>
<p>4 Start closing the zip, avoiding a zip malfunction, by pulling both sides as close as possible</p>	<p>5 Zip all the way round the mattress</p>	<p>6 Make sure zip is closed all the way and fastened securely</p>
